Rotating Bar Pin End Bushing Kit H-34013-188L

The New Design Features:

- Hendrickson's genuine, high quality, natural rubber product with a hardened steel bar pin
- Saves time and labor costs by eliminating re-work from incorrectly installed bushings
- No need to mark the old bar pin position prior to removal
- No clocking necessary during the bushing installation
- Ease of axle installation
- Seals to keep out damaging materials

The World Rides On Us®

The New Rotating Bar Pin End Bushing Kit Number H-34013-188L

Kit Contents

QTY. Description

1	Rotating Bar Pin End Bushing
2	Bar Pin Shims
2	Hex Bolts
4	Washers
2	Locknuts

Two (2) kits per beam or four (4) kits per suspension required to do a complete re-bush job.

The new rotating bar pin end bushing will work with any Hendrickson application or suspension where a current H-34013-088L or H-34013-087L kit is used.

Hendrickson puts a new twist on End Bushings!

Hendrickson's continuing product development has re-defined the installation procedure for rubber end bushings. Designed with a commitment to quality and innovation, the new **Rotating Bar Pin End Bushing** is the latest development to provide many benefits for both the installer and truck owner.

Once pressed into the beam, the new rubber end bushing can now be rotated to the correct angle for a perfect installation **the first time...every time**. The bushing becomes fixed at the required angle when the installation is properly completed and will not continue to rotate once the truck is back in use.

The New Rotating Bar Pin End Bushing Kit H-34013-188L

- Can be installed on all of the following Hendrickson suspensions equipped with equalizing beams: AR2™, R™, RS™, RT™/RTE™, HN®, and HAULMAAX.®
- No special tools are required to rotate the new bar pin bushing; a standard shop wrench will rotate the bushing into position with the axle.
- Available as a complete installation kit. Kits include shims to provide accurate and quick alignment and help increase tire life.
